Integrate into UVA System	2:30	

This Week Tasks
Introduction to Statistical Learning
Reinforcement Learning an Introduction
Read article abstracts
Integrate into UVA System

Questions/Issues
Do you know of any ongoing CHS experiments? I'm struggling to imagine experiments for something as abstract as CHS.
Do UVA courses cover self-correcting systems? I didn't see it in the catalog. It seems important to control/learning.
Does Systems research include systems that make decisions? E.g., a system of Reinforcement Learners?
Is Machine Learning being used to create models of systems? I guess it'd be something like optimal control?
How important are Markov Decision Processes to Systems research?
How does the University handle source code I write while a student?
